

Water Sustainability Fund 2018 Annual Report for Application # 5196

CPNRD Drought Management Plan and Local Drought Monitor

Contract Date: November 28, 2017

Amount Obligated: \$60,000

Current Project Activities:

We are currently in the data collection, planning review, and analysis of historic records phase of the project.

2018 Anticipated Activities

We anticipate completing the data collection, planning review, analysis of historic records, a vulnerability assessment and develop local drought thresholds.

Projected Project Expenses for Remainder of Project

No reimbursement claims have been made prior to the deadline of this annual report. The requested amount of \$60,000 is what remains.

Reassessment of Project Benefits
