

# Water Sustainability Fund 2019 Annual Report for Application # 5214

## CPNRD Conceptual Multi-use Dam Design

**Contract Date: December 18, 2018**

**Amount Obligated: \$56,270**

### **Current Project Activities:**

We are currently in the data collection, planning review, and analysis of historic records phase of the project.

### **2019 Anticipated Activities**

Identify existing and potential dam sites or other structures. Existing dam sites have been identified in the *Dam Inventory and Ranking, and Conversion of Records into a Digital Format* project. Other existing structures such as grade stabilization structures will be identified. Potential sites will be classified by using a combination of datasets including satellite and aerial imagery, hydrology, LiDAR, land use, and other parameters.

### **Projected Project Expenses for Remainder of Project**

No reimbursement claims have been made prior to the deadline of this annual report. The requested amount of \$56,270 is what remains.

### **Reassessment of Project Benefits**

TBD
