

Water Sustainability Fund 2020 Annual Report for Application # 5214

CPNRD Conceptual Multi-use Dam Design

Contract Date: December 18, 2018

Amount Obligated: \$56,270

Project Activities for the Past Year:

We have identified existing and potential dam sites or other structures. Existing dam sites were identified in the *Dam Inventory and Ranking, and Conversion of Records into a Digital Format* project. Potential sites will be classified by using a combination of datasets including satellite and aerial imagery, hydrology, LiDAR, land use, and other parameters.

2020 Anticipated Activities

We will review screening criteria and finalize sites to move forward for concept design.

Projected Project Expenses for Remainder of Project

Reimbursements were requested and awarded in the amount \$13,890.00. Of the requested amount (\$56,270.00), \$42,382.00 remains.

Reassessment of Project Benefits
