

# WSF Contract #10091 Annual Report

Nemaha Natural Resources District

Project Status: On-Track

April 1, 2025

In the first year of our project, the Nemaha Natural Resources District has reached out to eligible landowners within the project area through postcards and letters. Three projects have been pre-approved and are currently under construction by the irrigation dealer. We expect these nozzle packages to be installed and fully operational for the 2025 growing season.

Below is a summary of funds allocated, expended, and remaining for the Burr-Cook Paleovalley Aquifer Sub-Area Resiliency Project.

Pre-Approval (in development)	Amount	Remaining WSF Balance Initial \$60,000
JJ Farms – Wilson North	\$8,248	\$51,752
JJ Farms – Powell North	\$6,368	\$45,384
JJ Farms – Powell South	\$7,756	\$37,628
	\$22,372
