RE: Water Sustainability Fund Final Report – LBBNRD-AEM2 #10061

A brief timeline of LBBNRD Board action regarding the project in relation to the Water Sustainability Fund:

- April 1, 2025 Delivery of Final Report and Products
- April 10, 2025 AGF presentation of Final Report to LBBNRD Board and final payment issued.

This report is for the period between March 20, 2025, and the end of the project.

- 1) Project progress to date for the first report, then progress since the last annual report for future projects, including where you are relative to completing the project.
 - a. The project is complete, with final delivery occurring on April 1, 2025, explanation of results to staff occurring on April 8, 2025.
 - b. Presentation of Final Report and deliverables to the Board of Directors by Jared Abraham of AGF occurred on April 10, 2025.
 - c. Final payment to AGF was issued on April 10, 2025.
- 2) List project-related activities planned for the coming year.
 - a. The NRD had already been utilizing preliminary results and data in informing and educating the public.
 - Staff continue to reference deliverables for well permitting and development of irrigated acres projects, as well as for understanding potential community wellfield impacts.
 - c. Amid a districtwide moratorium, AEM has been utilized in delineating aquifer formations and management districts, as well as when considering variances to the moratorium.
 - d. The NRD has consulted the AEM data regarding potential future groundwater monitoring sites.
 - e. This study will be instrumental in selecting sampling sites for further understanding nitrate contamination and interaction between groundwater and surface water.
- 3) Forecast or projected cash flow for remainder of the project. This should be high level, not a detailed list, to give the Commission a projection of the fund's cash flow.
 - a. April 4, 2024 \$125,000 (WSF \$75,000 + LBBNRD \$50,000) check was sent to contractor for 30% down payment of the project. Claim #1 for WSF reimbursement was submitted April 5, 2024.
 - b. July 12, 2024 \$187,500 (WSF \$112,500 + LBBNRD \$75,000) was sent to contractor upon completion of the data acquisition. Claim #2 for WSF reimbursement was submitted July 12, 2024.

- c. April 10, 2025 \$104,166 (WSF \$62,499.00 + LBBNRD \$41,667.00) for the remaining 25% due upon delivery of the completed final report by the contractor.
- 4) Reassessment of the likelihood that benefits projected in the application will be realized and, for the "Final Report," a description of benefits realized or reasonably expected to be realized as compared to those stated in their application.
 - a. The benefits projected in the application have been realized, specifically:
 - i. work toward establishing a hydrogeologic framework (bedrock geology, aquifer type and extent, estimated aquifer volume and water in storage, transmissivity, and specific capacity)
 - ii. a more robust understanding of water level declines, groundwater uses and aquifer vulnerabilities spatially
 - iii. augmentation of the District's groundwater quantity and quality monitoring programs (management decisions regarding control areas and recharge areas)
 - iv. siting new test wells and production wells (sustainability and economics)
 - v. siting new LBBNRD monitoring locations.
